

SPITwSPOTS, Inc.

High Speed Internet

Mission statement:

Do a Great Thing!

What we do:

Provide Alaskans with
Better Internet at a Better Price

An aerial photograph of the New York City skyline at dusk. The Empire State Building is prominently featured in the center, illuminated with its characteristic red, white, and blue lights. The city is densely packed with skyscrapers, many of which have their lights on. The sky is a mix of dark blue and orange, indicating the time is either sunset or sunrise. The water of the harbor is visible in the background.

The technology: Fixed Wireless

The problem

Bridging the digital divide for Alaskans in hard to serve communities.

Terrain, Adverse conditions, and the sheer size of Alaska, are all challenges that are faced in last mile service delivery.

A close-up photograph of a person's hand, wearing a dark sleeve, pointing with their index finger at a document. A pen lies on the document nearby. The background is blurred, showing some bokeh lights.

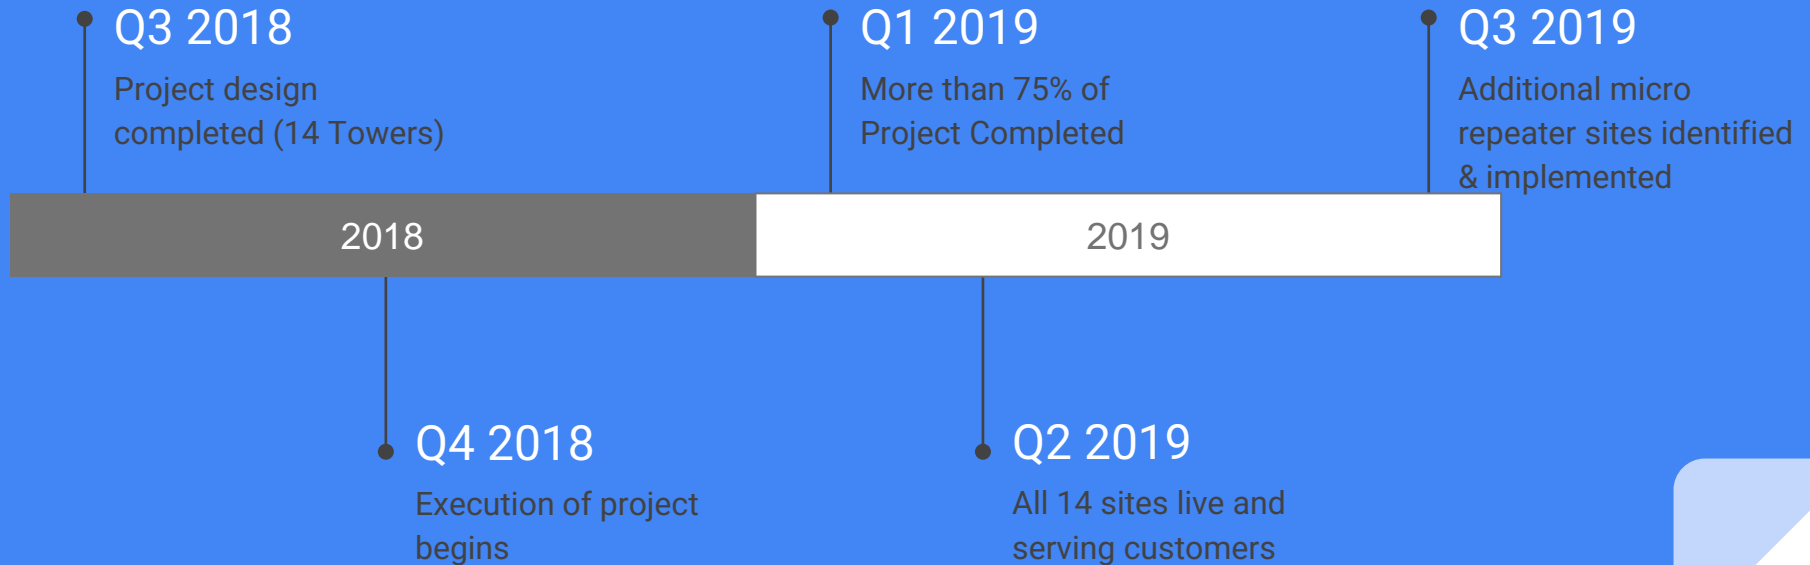

The solution

SPITwSPOTS has over a decade of experience in Fixed Wireless in Alaska.

Working closely with industry experts, we push the boundaries of what Fixed Wireless can deliver.

Central Peninsula Project

In 2018 SPITwSPOTS began a self funded project, expanding into the Central Kenai Peninsula

CARES Project

In 2020 SPITwSPOTS was awarded \$2M+ in CARES funding by the Kenai Peninsula Borough to bring improved internet to underserved and unserved communities.

How it works

Step 1

We identify a region that would benefit from better internet, at a better price

Step 2

We engage public or private sector with our proposal

Step 3

We execute on our proposal, improving communications access for the communities we operate in

Who Benefits?

SPITwSPOTS brings cost effective solutions to residential, small/medium businesses, carriers, enterprise, public sector, and health care/education providers.

Residential, Small &
Medium Businesses

Carriers

Enterprise, Public Sector,
Health Care, Education

Why now?

With more Alaskans working, learning, and telecommuting from home, better internet at a better price is necessary for Alaska's continued economic growth.
